

UNDP Human Development Report

THE FILIPINO STORY

Human Development in the Philippines (2025)

Reported by:

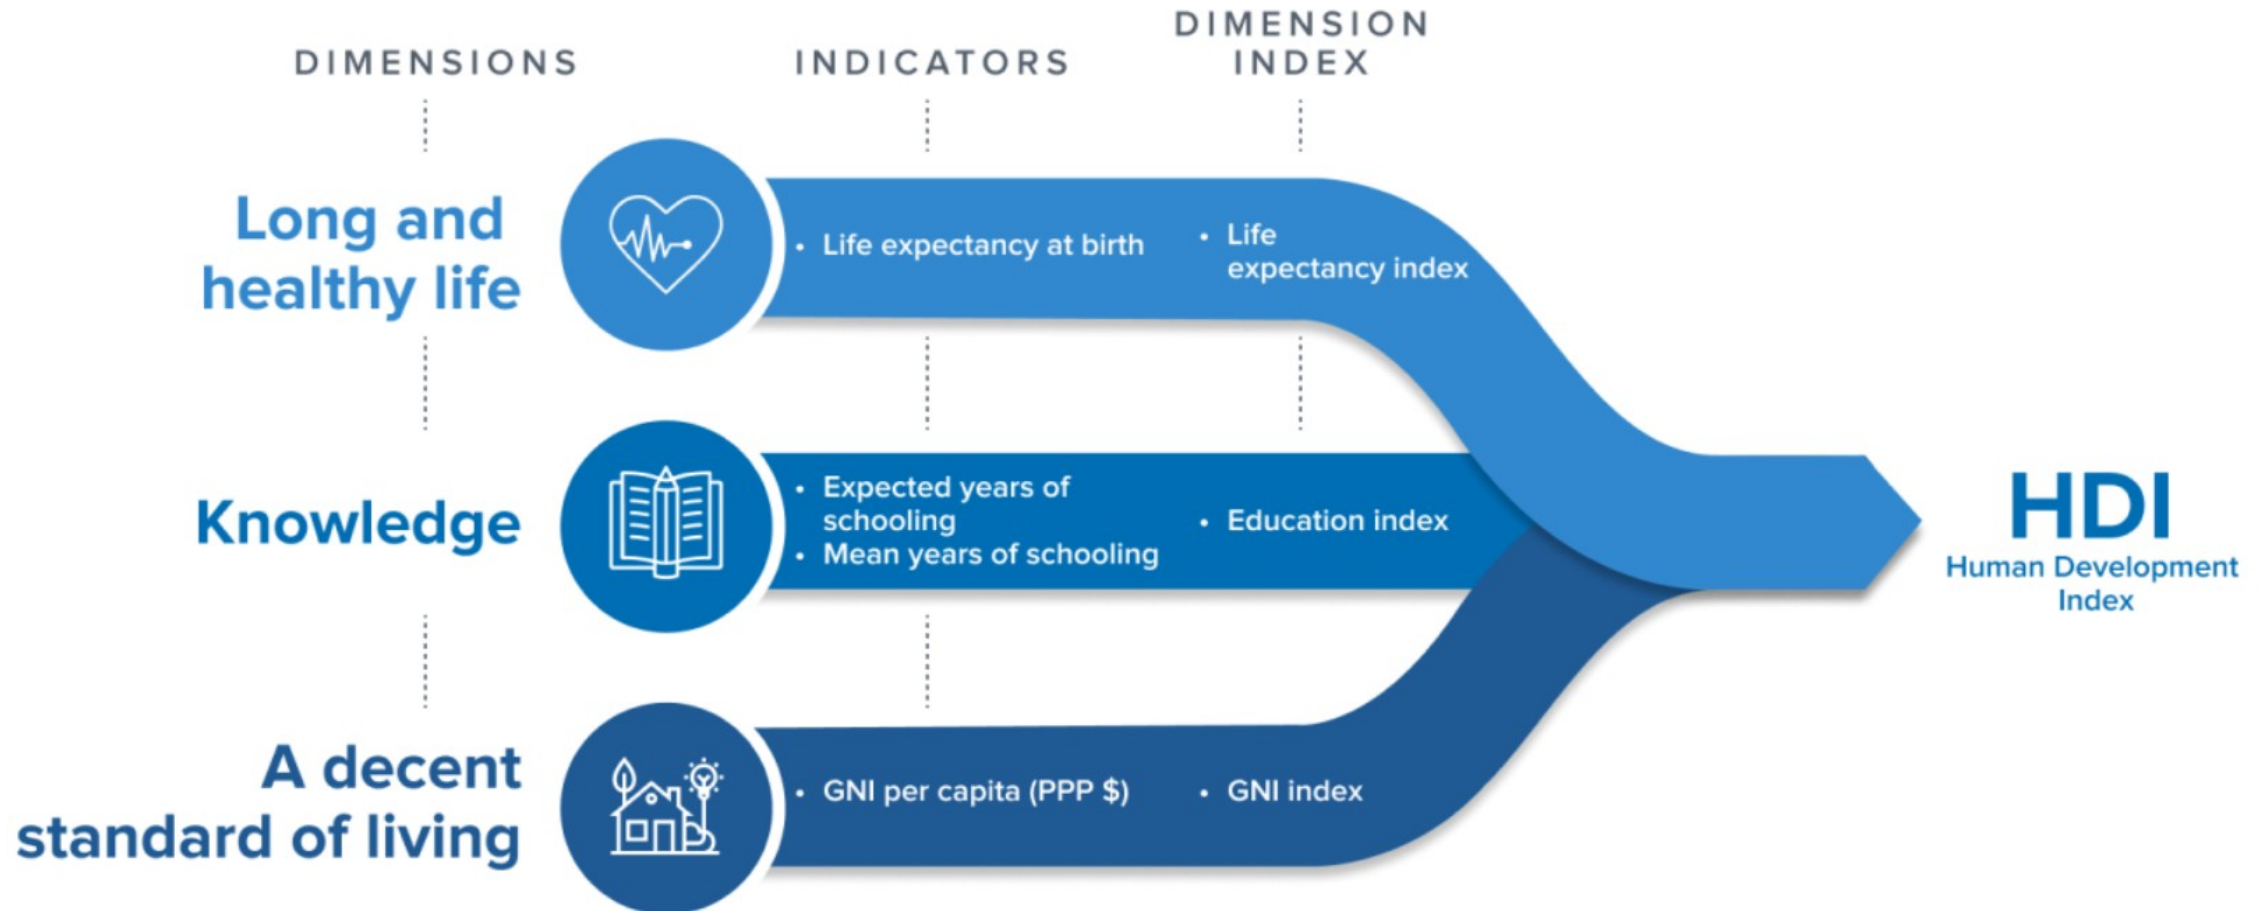

Kenn Arcenal

What is the purpose of HDR/HDI?

**Development
is about
People...
not profit.**

HDI Dimensions and Indicators

A long life, knowledge, and a decent living joined into one.

THE PHILIPPINES

One country,
117 million lives.

Scattered across thousands of islands.

IT COMES DOWN TO ONE NUMBER

0.720

Our Human Development score today.

WHERE WE STAND

The striving middle of the world.

*Not the top, not the bottom:
117th of 193 nations.*

HIGHEST

LOWEST

PHILIPPINES
117th of 193

**We just crossed
a line!**

Into “**high human development**” for the first time.

What it means...

We're living
longer.

*Life Expectancy is nearly 70 years now...
and still rising.*

KNOWLEDGE

We're learning more.

*More years in school than ever,
though many still finish fewer.*

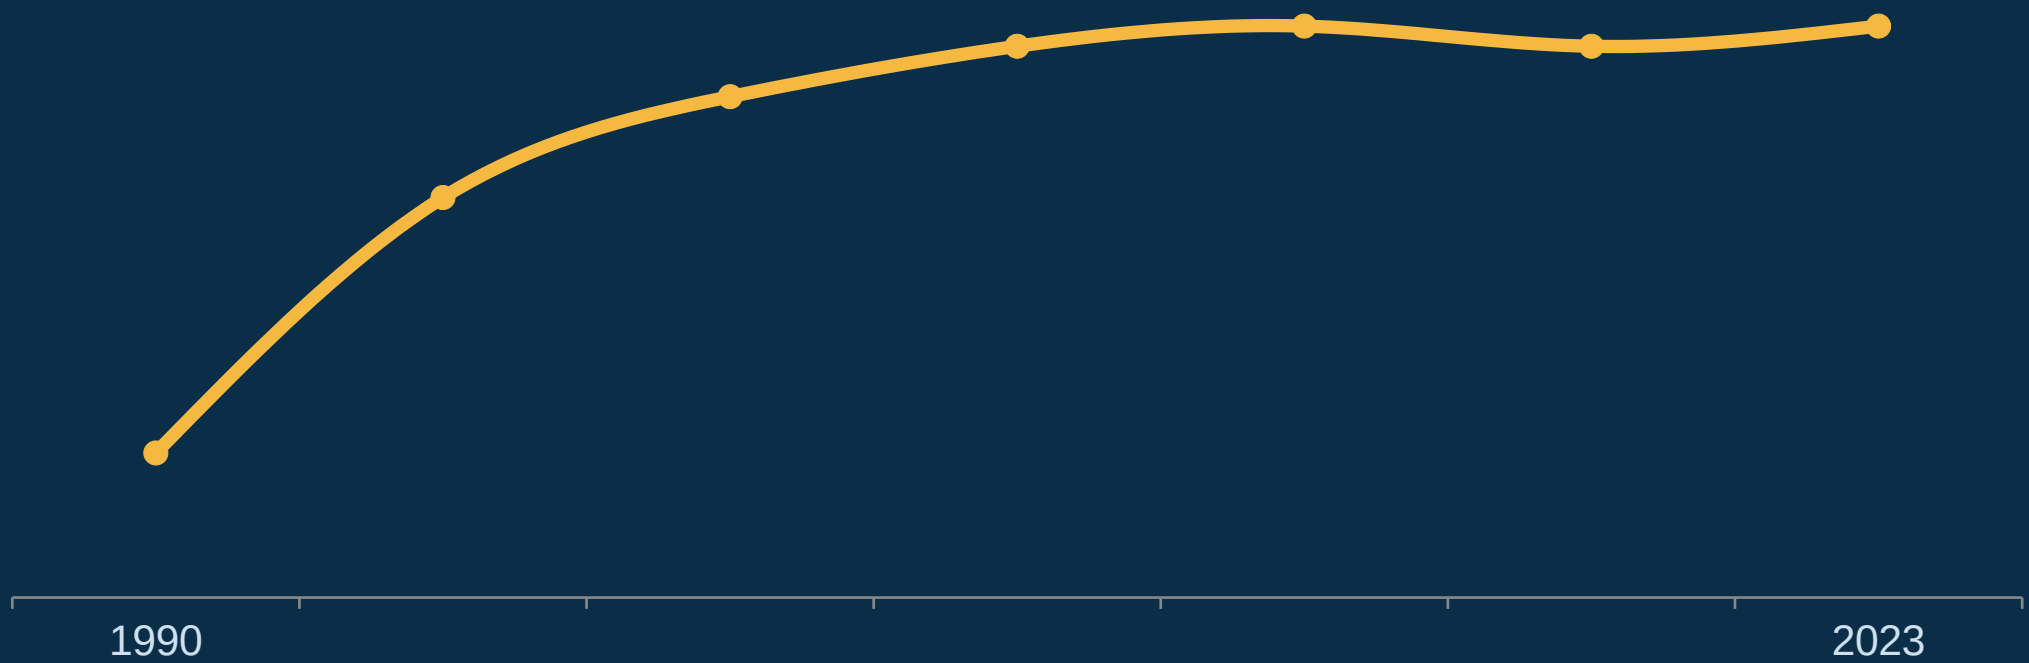

A DECENT LIVING

Earning
enough —
for some.

*Incomes are rising!
But unevenly shared.*

THREE DECADES OF PROGRESS

Slow... but upward!

THE REGIONAL MIRROR: Asia and the Pacific

*Our neighbors have risen higher...
and quicker!*

**We climb
beside faster
runners!**

*Islands of plenty.
Provinces of want.*

THE HIDDEN TRUTH

One number
hides unequal
lives.

A CLOSER LOOK ON GENDER

How women and men fare

GDI

Gender Dev't Index

How equally women and men
share in development.

0.984

near parity

GII

Gender Inequality Index

Development lost to gaps
between women and men.

0.351

rank 86

GSNI

Gender Social Norms Index

Filipinos who hold at least one
bias against women.

99.5%

in 2023

A CLOSER LOOK: INEQUALITY & THE PLANET

What the average hides

IHDI

Inequality-adjusted Human Development Index
(health, education, income)

Our score once inequality is taken into account.

0.597

a 17% drop

MPI

Multidimensional Poverty Index
(living standards)

Filipinos who are poor in more than just income.

3.9%

Around 4.5M people

PHDI

Planetary pressures-adjusted Human Development Index
(CO2 emissions and resource consumption)

Our score once the planet's costs are counted.

0.680

eased

The theme of this year's report:

**A matter of choice
in the age of AI.**

However...

Progress is
stalling.

Worldwide, the slowest pace in 35 years.

THE HEART and CORE OF IT ALL

Development is not fate. It is decided.

CHOICE

BEHIND THE DECIMAL

Not a number.
Millions of
names.

**The next chapter
is ours to write.**
