OFFICE OF THE VICE PRESIDENT FOR ACADEMICS
College of Alternative and Lifelong Learning

Taft Ave. cor. Ayala Blvd., Ermita, Manila

(+632) 5317-1768 loc. 570/776

call@pnu.edu.ph

4. Present Position/ Name of Institution (If employed):

Ph.D. Candidate (Korea University, Seoul, South Korea)

5. Reason/s for Taking this course

Although I have extensive experience in language education research and have designed and investigated instructional approaches for English language learning, I believe that effective teaching requires not only strong theoretical and research foundations but also a continuous refinement of pedagogical practice. I took the Principles and Methods of Teaching course to further strengthen my understanding of evidence-based instructional strategies, classroom management, assessment, and learner-centered pedagogy. As an aspiring university educator and researcher, I wanted to deepen my ability to translate research findings into effective classroom practices and enhance my competence in designing meaningful learning experiences that promote student engagement and achievement.

6. Your greatest professional achievement

Professionally, I have been fortunate to publish in SSCI-, Scopus-, KCI, and PCI-indexed journals, allowing me to contribute to research in applied linguistics and education. At the same time, one accomplishment I value just as much is my ongoing advocacy of conducting free educational seminars and workshops for public school teachers and students, which I started in 2017.

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

7. What you are good at (special talents, skills)?

Quantitative and qualitative research, public speaking (competitive speaking, hosting, keynote, seminar/training/workshop facilitation).

8. What is it that you like in *Teaching or becoming a Teacher someday?*

What I enjoy most about teaching is witnessing students grow academically and personally. I have always believed that a great teacher can shape not only what students know but also how they think and view themselves as learners. My experiences as a researcher have reinforced the importance of evidence-based teaching, but they have also reminded me that effective education is built on meaningful relationships with students. Becoming a teacher would allow me to combine my passion for research with my commitment to helping learners succeed, while continuously learning from the classroom myself. For me, teaching is one of the most meaningful ways to contribute to society because its impact extends far beyond the classroom.

9. How do you like to be remembered in this course?

I would like to be remembered as the Oppa of the class, not simply because I'm older or in Korea, but because I hope to embody what a real oppa represents: someone who is dependable, caring, approachable, smart, and always willing to support others.
