

2E-EDUC 3 – PRINCIPLES AND METHODS OF TEACHING

AY 2025-2026 Term 2

Worksheet 1- Pre- Course Competency Survey on the Philippine Professional Standards for Teachers (PPST) Beginning Teachers and Action Plan

Name: Arcenal, Kenn

With teaching experiences/ How many years: Two years (Formal), three years (Informal)

Subjects taught: English

Level: (Elementary/ Secondary/College): Pre-school, Elementary, Secondary, College, Professional

Without teaching experiences: _____

Date submitted: July 08, 2026

Description

The checklist below contains a list of competencies/indicators covered by Domains 1, 3, 4 and 5 and corresponding strands under the Beginning Teacher Category of the PPST . For each indicator, there are four possible levels of competency (i.e., Novice, Apprentice, Practitioner, and Expert). You will use this matrix to assess your perceived level of competency prior to studying the course. Please tick (/) what best describes your perceived level of competency then accomplish the summary table and answer the reflections below.

Legend:

Novice – means I cannot do this yet but I would like to learn.

Apprentice – means I can do a little and am still learning how to do this.

Practitioner – means I can do this but I need to learn more, practice and improve.

Expert – I can do this very well.

Domain/Strand	Indicator (Beginning Teacher)	Perceived Level of Competency			
		Novice	Apprentice	Practitioner	Expert
Domain 1- Content Knowledge and Pedagogy					
Strand 1.1 Content knowledge and its application within and across curriculum areas	1.1.1 Demonstrate content knowledge and its application within and/or across curriculum teaching areas			O	
Strand 1.2 Research-based knowledge and principles of teaching and learning	1.2.1 Demonstrate an understanding of research-based knowledge and principles of teaching and learning.			O	
Strand 1.3 Positive use of ICT	1.3.1 Show skills in the positive use of ICT to facilitate the teaching and learning process.			O	
Strand 1.4 Strategies for promoting literacy and numeracy	1.4.1 Demonstrate knowledge of teaching strategies that promote literacy and numeracy skills			O	
Strand 1.5 Strategies for developing critical	1.5.1 Apply teaching strategies that develop critical and creative thinking, and/or other			O

SUMMARY RESULT

Domain/Strand	Perceived Level of Competency			
	Novice	Apprentice	Practitioner	Expert
Domain 1- Content Knowledge and Pedagogy	0/7	1/7	6/7	0/7
Domain 3 - Diversity of Learners	2/5	1/5	2/5	0/5
Domain 4 - Curriculum and Planning	0/5	2/5	3/5	0/5
Domain 5 - Assessment and Reporting	0/5	3/5	2/5	0/5

Part II. Reflections

1. Overall, how did you fare? Which Domain/Strand you perceived that are you strong at (Practitioner/Expert)?

Overall, I fared well, with most of my self-ratings at the Practitioner level. My strongest domain is Domain 1 – Content Knowledge and Pedagogy (6 of 7 at Practitioner), which reflects my experience teaching English across pre-school to professional levels. I also perceive myself as fairly strong in Domain 4 – Curriculum and Planning (3 of 5 at Practitioner). I did not rate myself as an Expert in any domain, as I know there is a lot of room to improve my craft.

2. Which Domain/Strand you perceived that are you Weak at (Novice/Apprentice)?

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

PHILIPPINE NORMAL UNIVERSITY
The National Center for Teacher Education
OFFICE OF THE VICE PRESIDENT FOR ACADEMICS
College of Alternative and Lifelong Learning

Taft Ave. cor. Ayala Blvd., Ermita, Manila

(+632) 5317-1768 loc. 570/776

call@pnu.edu.ph

I perceived myself as weakest in Domain 3 – Diversity of Learners and Domain 5 – Assessment and Reporting. In Domain 3, I rated myself Novice or Apprentice in 3 of 5 indicators; although I know that students have different learning styles, I cannot claim that I practice this 100%, especially when it comes to children with special needs. This stems from my limited formal classroom experience, as my informal teaching hasn't fully exposed me to the wide range of learner needs. In Domain 5, I rated Apprentice in 3 of 5 indicators, largely because I have little experience with the bureaucratic requirements and forms involved in assessment and reporting, such as DepEd forms.

3. For those who are currently teaching and/or have teaching experiences, which domain and strand of the PPST do you find most challenging? Why do you say so?

I find Domain 3 – Diversity of Learners the most challenging. Students come with different learning styles, demographic backgrounds, and contexts, and teachers know there is no one-size-fits-all approach. However, given administrative constraints like limited subject time and large class sizes, fully accommodating every learner becomes difficult. In practice, teachers are simply doing their best to reach as many students as they can within these limitations.

4. What are your insights about the competencies expected of a Beginning Teacher in relation to your perceived competency and your desire to becoming a Proficient Teacher?

The competencies expected of a Beginning Teacher in the PPST are comprehensive. They cover not just content mastery but also responsiveness to diverse learners, thoughtful curriculum planning, and systematic assessment. My perceived competency shows real strength in Domain 1, Content Knowledge and Pedagogy, where I rated myself mostly Practitioner. But it also reveals gaps in areas like teaching learners with disabilities, learners in difficult circumstances, and learners from indigenous groups, where I marked myself Novice or Apprentice. This tells me that content knowledge alone does not make a proficient teacher. The harder, more human parts of teaching, like reaching every kind of learner and documenting their progress well, require deliberate practice and formal classroom exposure that I am still developing. My desire to become a Proficient Teacher drives me to intentionally close these gaps, rather than relying solely on my subject strengths. In the end, this self-assessment gives me a realistic starting point and a clear direction for where I want to grow.

Domain 3 – Diversity of Learners (Strand 3.4)	Demonstrate understanding of the special educational needs of learners in difficult circumstances (geographic isolation, chronic illness, displacement, child abuse and child labor)	Novice	Read DepEd and research materials on learners in difficult circumstances. Join community immersion or service learning to understand real contexts. Stay humble and listen to learners' lived experiences rather than assuming their needs.	6 months to 1 year	Human: guidance counselors, community partners, NGOs. Materials: case studies, DepEd Child Protection Policy references.
Domain 3 – Diversity of Learners (Strand 3.5)	Demonstrate knowledge of teaching strategies that are inclusive of learners from indigenous groups	Novice	Study contextualization and indigenization of lessons. Attend training on Indigenous Peoples Education (IPEd). Collaborate with teachers handling IP learners and adapt English lessons to be culturally responsive.	6 months to 1 year	Human: IPEd teachers, cultural community members. Materials: IPEd curriculum guides, localized learning resources.
Domain 4 – Curriculum and Planning (Strand 4.1)	Prepare developmentally sequenced teaching and learning process to meet curriculum requirements	Apprentice	Study backward design and curriculum mapping. Practice sequencing lessons from simple to complex using the K-12 and MATATAG curriculum guides. Seek feedback from mentors on my lesson plans and revise with an open mind.	3 to 6 months	Human: mentor teachers, course supervisor. Materials: curriculum guides, sample lesson plans, budget of work templates. Funds: minimal
Domain 4 –	Identify learning	Apprentice	Learn to write measurable	3 to 6 months	Human: master

------	---	--	--	--	---

Part IV. In a written text of 300-500 words, explain the importance of professional development (PD) activities in the personal growth and professional development of teachers?

If there is one thing my journey has taught me, it is that a teacher never really stops being a student. I have been teaching English for a few years now, both formally and informally, and I am currently pursuing my Ph.D. abroad. Yet even with all of that, when I honestly assessed myself against the Philippine Professional Standards for Teachers, I still found gaps, especially in handling diverse learners and in assessment and reporting. That, to me, is exactly why professional development matters. It keeps us honest, and it keeps us growing.

In the Philippine context, professional development is more important than ever. Our classrooms are among the most diverse and challenging in the world, often with large class sizes and learners from many linguistic and cultural backgrounds. On top of that, reforms like the shift from curriculum to curriculum in a short period of time mean Filipino teachers must constantly update themselves. Professional development, whether through DepEd training or graduate studies, helps us adapt and continue serving our learners well.

On a personal level, professional development keeps me humble and open-minded. Every seminar I attend or paper I read reminds me that there is always someone who knows more, and something new to learn. When I honestly rated myself and admitted I could not yet claim to fully practice differentiated teaching, that was not a comfortable thing to write down. But growth starts with that kind of honesty, and professional development gives me a constructive way to act on it rather than pretending the gaps don't exist.

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

PHILIPPINE NORMAL UNIVERSITY
The National Center for Teacher Education
OFFICE OF THE VICE PRESIDENT FOR ACADEMICS
College of Alternative and Lifelong Learning

Taft Ave. cor. Ayala Blvd., Ermita, Manila

(+632) 5317-1768 loc. 570/776

call@pnu.edu.ph

On a professional level, it sharpens the actual craft of teaching. My research on reading comprehension and literacy constantly reminds me how much theory needs to meet real classroom practice. Learning differentiated instruction, for example, would help me reach learners I currently struggle to fully support, while training on assessment would build the systems my limited formal experience has not yet developed.

This is also tied to my bigger dream. Someday, I want to become a professor in the Philippines and a teacher-trainer who travels across the country to share what I have learned from my extensive experience abroad as a professional and researcher. I believe in paying it forward, which has always been my advocacy since 2017 when I founded Jack of All Speaking to make learning more accessible by providing free seminars to public school teachers and students. When we model lifelong learning, we inspire the same in our students.

In the end, professional development is what carries a teacher from novice toward proficiency. It is a continuous journey of reflection and improvement, and it uplifts not just the teacher, but every learner and community they serve.

Overview of the Philippine Professional Standards for Teachers (PPST)

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

The Philippine Professional Standards for Teachers (PPST), which is built on NCBTS, complements the reform initiatives on teacher quality from pre-service education to in-service training.

- It articulates what constitutes teacher quality in the K to 12 Reform through well-defined domains, strands, and indicators that provide measures of professional learning, competent practice, and effective engagement.
- It makes explicit what teachers should know, be able to do and value to achieve competence, improved student learning outcomes, and eventually quality education. It is founded on teaching philosophies of learner-centeredness, lifelong learning, and inclusivity/inclusiveness, among others.
- The professional standards, therefore, become a public statement of professional accountability that can help teachers reflect on and assess their own practices as they aspire for personal growth and professional development.

Teacher Quality in the Philippines

The Philippine Professional Standards for Teachers defines teacher quality in the Philippines. The standards describe the expectations of teachers' increasing levels of knowledge, practice and professional engagement. At the same time, the standards allow for teachers' growing understanding, applied with increasing sophistication across a broader and more complex range of teaching/learning situations.

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

The following describes the breadth of 7 Domains and the Strands that are required by teachers to be effective in the 21st Century in the Philippines. Quality teachers in the Philippines need to possess the following characteristics:

Domain 1 - Content Knowledge and Pedagogy

- recognize the importance of mastery of content knowledge and its interconnectedness within and across curriculum areas, coupled with a sound and critical understanding of the application of theories and principles of teaching and learning. They apply developmentally appropriate and meaningful pedagogy grounded on content knowledge and current research. They display proficiency in Mother Tongue, Filipino and English to facilitate the teaching and learning process, as well as exhibit the needed skills in the use of communication strategies, teaching strategies and technologies to promote high-quality learning outcomes.

Strands

1. Content knowledge and its application within and across curriculum areas
2. Research-based knowledge and principles of teaching and learning
3. Positive use of ICT
4. Strategies for promoting literacy and numeracy
5. Strategies for developing critical and creative thinking, as well as other HOTS
6. Mother Tongue, Filipino and English in teaching and learning

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

7. Classroom communication strategies

Domain 2 – Learning Environment

- provide learning environments that are safe, secure, fair and supportive in order to promote learner responsibility and achievement. They create an environment that is learning-focused and they efficiently manage learner behavior in a physical and virtual space. They utilize a range of resources and provide intellectually challenging and stimulating activities to encourage constructive classroom interactions geared towards the attainment of high standards of learning.

Strands

1. Learner safety and security
2. Fair learning environment
3. Management of classroom structure and activities
4. Support for learner participation
5. Promotion of purposive learning
6. Management of learner behaviour

Domain 3 – Diversity of Learners

- establish learning environments that are responsive to learner diversity. They respect learners' diverse characteristics and experiences as inputs to the planning and design of learning opportunities. They encourage the celebration of diversity in the classroom and the need for

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

teaching practices that are differentiated to encourage all learners to be successful citizens in a changing local and global environment.

Strands

1. Learners' gender, needs, strengths, interests and experiences
2. Learners' linguistic, cultural, socio-economic and religious backgrounds
3. Learners with disabilities, giftedness and talents
4. Learners in difficult circumstances
5. Learners from indigenous groups

Domain 4 – Curriculum and Planning

- interact with the national and local curriculum requirements. They translate curriculum content into learning activities that are relevant to learners and based on the principles of effective teaching and learning. They apply their professional knowledge to plan and design, individually or in collaboration with colleagues, well-structured and sequenced lessons that are contextually relevant, responsive to learners' needs and incorporate a range of teaching and learning resources. They communicate learning goals to support learner participation, understanding and achievement.

Strands

1. Planning and management of teaching and learning process
2. Learning outcomes aligned with learning competencies
3. Relevance and responsiveness of learning programs
4. Professional collaboration to enrich teaching practice
5. Teaching and learning resources including ICT

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

Domain 5 – Assessment and Reporting

- apply a variety of assessment tools and strategies in monitoring, evaluating, documenting and reporting learners' needs, progress and achievement. They use assessment data in a variety of ways to inform and enhance the teaching and learning process and programs. They provide learners with the necessary feedback about learning outcomes that informs the reporting cycle and enables teachers to select, organize and use sound assessment processes.

Strands

1. Design, selection, organization and utilization of assessment strategies
2. Monitoring and evaluation of learner progress and achievement
3. Feedback to improve learning
4. Communication of learner needs, progress and achievement to key stakeholders
5. Use of assessment data to enhance teaching and learning practices and programs

Domain 6 – Community Linkages and Professional Engagement

- establish school-community partnerships aimed at enriching the learning environment, as well as the community's engagement in the educative process. They identify and respond to opportunities that link teaching and learning in the classroom to the experiences, interests and aspirations of the wider school community and other key stakeholders. They understand and fulfil their obligations in upholding professional ethics, accountability and transparency to promote professional and harmonious relationships with learners, parents, schools and the wider community.

Strands

1. Establishment of learning environments that are responsive to community contexts

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

call@pnu.edu.ph

2. Engagement of parents and the wider school community in the educative process
3. Professional ethics
4. School policies and procedures

Domain 7 – Personal Growth and Professional Development

- value personal growth and professional development and exhibit high personal regard for the profession by maintaining qualities that uphold the dignity of teaching such as caring attitude, respect and integrity. They value personal and professional reflection and learning to improve their practice. They assume responsibility for personal growth and professional development for lifelong learning.

Strands

1. Philosophy of teaching
2. Dignity of teaching as a profession
3. Professional links with colleagues
4. Professional reflection and learning to improve practice
5. Professional development goals
